Installer Reviews and Feedback

Sunsynk has many loyal customers all around the world. Here are just a few thoughts from some of them.

Why do you choose Sunsynk over other brands?

Reliability and ease of installation

What do you like about Sunsynk?

Competitive, intelligent and future ready

How easy is Sunsynk to install?

After your first Sunsynk, install time gets less and less. When paired with comms-enabled batteries, install time is even less.

How do you find the user interface?

Intuitive and easy to use

"Sunsynk is a welcomed and necessary Hybrid Inverter brand that is needed in South Africa. High quality and intelligent characteristics enable the consumer to have an Inverter ready for future changes in energy management without needing to replace hardware. Well-engineered and backed by professionals."

Why did you choose Sunsynk over other brands?

A number of reasons, most notably:

- Price point
- Ease of installation
- Exceptional customer support from both Sunsynk directly and local South African Distributors
- Gen and Wind inputs

How easy is Sunsynk to install?

Sunsynk is very easy to install. Once you have done a couple of installs and understand the setup and interface, you can install this inverter as quickly as any other on the market that we have worked with.

How do you find the user interface?

It is very simple to use and easy to understand. The touch screen and push-button combination make it very easy to use.

"We have the luxury of free choice as we do not have any ties with any specific brand on the market. We have chosen Sunsynk as our inverter of choice at Versofy Solar which demonstrates the value they offer."

Installer Reviews and Feedback

Sunsynk has many loyal customers all around the world. Here are just a few thoughts from some of them.

Why did you choose SunSynk over other brands?

It is by far the best Inverter we have used in the last two years. Just no problems and it give you the leading edge over the rest.

What do you like about SunSynk?

It is a Full Hybrid and it can take a lot of beating from the users, plus it runs easy without the battery.

How easy is SunSynk to install?

We love to install the units. They are the fastest we install. It takes us just 4.5 hours to do a full installation of a backup system including two batteries. It speaks for itself.

How do you find the user interface?

Love it plus it is easy to do hand over to an end-user or installer help as well.

Andre' Swanepoel - Energy Worx Solar Solutions (PTY) Ltd.

Why installers and engineers love Sunsynk?

Professionals love the Sunsynk brand because of the quality native English language, technical training and support for all the inverter systems. Creating an engaging and informative training system is very difficult to do, let alone do well. We have found having native English speakers delivering quality technical support has set us apart, and rapidly built brand loyalty. There is a library of training resources and our team on hand to answer installers questions quickly.
